

Equilin (Standard)

Cat. No.:	HY-B1176R
CAS No.:	474-86-2
Molecular Formula:	C ₁₈ H ₂₀ O ₂
Molecular Weight:	268.35
Target:	Estrogen Receptor/ERR; Reference Standards
Pathway:	Vitamin D Related/Nuclear Receptor; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

Equilin (Standard) is the analytical standard of Equilin. This product is intended for research and analytical applications. Equilin (7-Dehydroestrone) is an important member of the large group of oestrogenic substances and is chemically related to menformon (oestrone). Equilin increases the growth of cortical neurons via an NMDA receptor-dependent mechanism^[1] [2].
